Drought Response: 2016 Update

Production and Mandated Conservation Target (Jun 2015-Oct 2016)

Drought Response: 2016 Update

New conservation regulations adopted by State

- New conservation standards account for suppliers' unique water supply and demand conditions
- City's conservation standard expected to reduce to 2013 actual production
- Existing prohibitions on water waste will still apply
- SWRCB requires submittal of supply data by June 22nd, and continued monthly conservation reporting
- Compliance determined based on total conservation June 2016 - January 2017

Drought Response: 2016 Update

New conservation regulations adopted by State

- Planned responses to new regulations:
 - Seek Council approval to modify Water Shortage Cont. Plan (2-day/week to 3-day/week irrigation schedule)
- Maintain existing permanent prohibitions:
 - Runoff and water waste
 - Irrigation during or within 48 hours following rain
 - washing down hardscapes
 - Washing car without an automatically closing nozzle
