An Even Brighter Future for Paso Robles' Downtown City Park Playground

PASO ROBLES, CA – The City of Paso Robles is installing more lighting over the award-winning downtown City Park playground this winter. Please be aware that certain sections of the playground will be closed while the lights are installed.

In 2016, courtesy of an \$805,000 grant, the downtown City Park received upgrades to infrastructure, landscaping and the playground. Later that year, the Paso Robles Chamber of Commerce honored the City with its annual Downtown Beautification Award.

“We love to see the community embracing our newly renovated City Park,” beams Julie Dahlen, Director of Community Services. “Adding lights will make the playground even more magical for youngsters enjoying the park in the evening hours. Installation will be carefully phased so that only one part of the playground will be shut down at a time.”

Weather pending, this project will be done before PRJUSD winter break begins on 12/22.

The City of Paso Robles thanks you for your patience during this project.

For more information, call City Maintenance Superintendent, Freda Berman at 805-237-3873.
